- 3) What happens when a ray of light enters from [1]
 - a) air to glass?
 - b) glass to air?

SAMPLE OF CASE BASED QUESTION

Q. The following question is case /source based question. Read it carefully to answer the questions that follow.

In an ecosystem, living organisms depends on one another for survival. Every organism is linked to many other organisms through food webs. Animals depend on plants for food and shelter; plants depend on animals for pollination, reproduction and seed dispersal. Fungi and bacteria decompose other organisms to add nutrients to the soil, and plants depend on these nutrients to grow. In this way, an ecosystem is a well balanced system in which each organism has an important role. Loss of even a few organisms affects this balance and harms the ecosystem.

Therefore biodiversity is important for the sustenance of an ecosystem. It provides a wide range of materials and food for survival, prevents extinction of species, and allows organisms to adapt to changes in the environment.

- 1) What do you mean by ecosystem? [1]
- 2) Why conservation of bio diversity is important? [1]
- 3) In an ecosystem animals and plants are interdependent on each other. Explain? [2]

SAMPLE OF CASE BASED/SOURCE BASED QUESTION

[4 marks]

Q. The following question is case /source based question. Read it carefully to answer the questions that follow.

The transformation from a plant to a finished product involves three types of economic activities. These are primary, secondary and tertiary activities. Primary activities include all those connected with extraction and production of natural resources.

Agriculture, fishing and gathering are good examples. Secondary activities are concerned with the processing of these resources. Manufacturing of steel, baking of bread and weaving of cloth are examples of this activity. Tertiary activities provide support to the primary and secondary sectors through services.

1. Name the three types of economic activities. [1]

2. Give few examples of Tertiary Activity [1]

3. Explain why secondary activities are dependent on primary activities. [2]

Give two reasons.
